

Z96-F Meter Counter

Features:

These counters are suitable for recording the length of textiles, cables, paper and leathers. They are usually set with machines for use. Their lightweight design eases to be set on the machine and reduce costs. They are capable of counting to 100,000 meters or 100,000 yards depending on the model chosen. The large bright counter enhances visibility. They are widely used by manufacturers of long length materials or products.
